Everio R is ready to capture special moments wherever you are, whenever you want.. Hope this saves someone the sleep I lost staying up all night to figure it out,Zac.. e Open the desktop folder and click on the “imovie project” folder This will launch iMovie and all your desired clips will be there including the audio you couldn’t hear in Quicktime.. (see www.apple.com/quicktime/mpeg2)WORKFLOW SOLUTION:a Create a folder on the desktop and download the entire SD-VIDEO folder the camera hard disk to your new work folderb.. Delete any files that you don’t want in your movie NOTE: You may need to change the name of the file from.

MOD to mpeg Also, you won’t have audio because of a long technical discussion dealing with the codec for MPEG-2 and demux’ing it etc.. MOD hard disk files into a format that can be used in iMovie, but today I found a pretty easy solution based on Quicktime MPEG-2 Player, DVDrop and iMovie.. d Now highlight all the files the folder, which after deleting the MOI’s and reviewing in Quicktime will only contain the desired files for the movie.. PROBLEM: iMovie can’t access the camera directly to import the video and Quicktime Pro doesn’t even understand the MPEG-2 format.. (see www.dropdv.com)b Optional - download and install Quicktime MPEG-2 player so you can preview clips before you burn disk space and time converting them to DV and importing to iMovie. BACKGROUND: JVC Everio camcorders use hard disk media to record video files which is great for navigating directly to the video you want to edit.. The camera stores the video in a MOD file in an MPEG-2 format JVC provides software called Captivity MPEG Edit EX for Evario, but it is not quality editing software and not worth the time to learn.
